## Coding Profile

As a skilled web developer, I specialize in crafting impactful online experiences that seamlessly blend functionality and design. My expertise spans both Frontend and Backend development, where I excel in coding with HTML, CSS, JavaScript, and Python. I leverage frameworks like React and Flask to create dynamic and responsive web applications that engage users and deliver exceptional performance.

I possess a keen understanding of database management and version control systems, enabling me to maintain robust and efficient coding practices. Beyond technical prowess, my excellent communication skills facilitate the establishment of productive relationships with colleagues, fostering a collaborative and positive coding environment for enhanced project outcomes.

## Relevant Experience

- **Restaurant Website** - Developed a sushi-themed restaurant website using React.js for frontend and Node.js for backend, enhancing full-stack programming skills. Integrated Stripe for shopping cart checkout, delivering a seamless and flexible user experience.
- **Weather App** - Created a dynamic Weather App that accurately forecasts current weather conditions. Utilized APIs on backend and facilitated communication to frontend, enabling users to obtain real-time weather updates by entering a zip code with a country code.
- **Motivational Quote App** - Crafted a Motivational Quote App using React Native, seamlessly communicating with two distinct APIs. Each button click triggers a unique quote displayed against a captivating background, showcasing creative problem-solving and API integration skills.
- **RESTful API** - Experimented with developing an API where I familiarized myself with the in's and out's of its mechanics while testing the requests with postman along with mongoose.

## Education

**University of Colorado Boulder**

**B.A.S. Integrative Physiology (IPHY)**

Emphasis: Health and the functions of the human body.

Boulder, CO

Aug 2011 - May 2016

## Work Experience

**Information Technology**, Freelance, Aurora, CO

Aug. 2019 - Present

- Cooperated in integrating the Toast POS system in a business which increased sales and profits by establishing a more convenient method for getting customers orders.
- Supervised planning for a website for a salon with a mock-up of the website.
- Created a multitude of projects that include API's, OOP, and databases for increased upgrades in programming skills.

**Building Maintenance Supervisor**, *Roth Property Maintenance*, Centennial, CO

Feb. 2018 - Present

- Advised a team for facility maintenance improving my leadership skills.
- Encourage positivity in the work environment for healthy communication and teamwork.
- Trained new employees on company policies and procedures.
